## Mackow Industries Announces Fargo Plant Expansion

Mackow Industries is excited to announce that it has expanded its manufacturing operation in West Fargo. The expansion doubles the size of the plant to 60,000 sq. ft. from the original 30,000 sq. ft. when the plant opened in 2017. The expansion is a key part of Mackow Industries plan to service its existing and new customers by providing the space and manufacturing capacity to meet the needs of the US market. “It is a real commitment to our clients and future growth in the U.S.” says Ryan McClelland, Business Development Manager for Mackow Industries. “We have worked hard to meet our customer’s needs in this market in the last couple of years and see this as a key part of our long-term growth” added McClelland.

As a full-service manufacturing and assembly company, Mackow USA already services a number of key agriculture and transportation manufacturers. The West Fargo plant is also geographically well positioned to continue servicing its clients well into the future. This substantial expansion will facilitate some exciting new projects expected to come online in 2020 and beyond.
